

Deeply clean your paint brushes **in just 20 seconds**, to prevent them from being ruined by dried paint particles. No need to throw away your paint brushes at the end of the day, instead **quickly clean** your favourite paint brushes, after and even during the paint job, to enjoy them longer!

Clean and Go

Quick paint brush cleaning system

Deeply clean brushes in 20 seconds - saving you time!

Prevent throwing away your paintbrushes - saving you money!

No more cleaning in the sink - saving the environment!

Clean and Go

For quick and deep cleaning of paint brushes

- Fill with water when using water based paints.
- Fill with white spirit when using oil based paints.
- For use with all types of brushes, pure bristle and synthetic.
- Work brush firmly over the grid for just 20 seconds.
- After weeks/months: once residue is level with grid, replace with refill set and dispose of the used bag responsibly.

Prevents bristles from hardening and reduces the risk of particles in the paint

- Certain paints harden in the brush during the paint job.
- Use Clean and Go, during and after the paint job, to remove any drying paint particles from the brush.

It is easy to act responsibly

- Access to safe and clean drinking water is a scarce and precious privilege, avoid paint entering the watercourse.
- Take your Clean and Go to the job and keep the site clean.

Tip: For brush storage, we recommend keeping your brushes in our Store and Go systems based on eco-friendly brush gel.
